📍 Thu Duc City, Ho Chi Minh City

Final-year Data Science student at VNUHCM - University of Science with a solid foundation in Mathematics and Statistics. Proficient in Python, PyTorch, and end-to-end AI pipelines. Actively seeking an AI/Data Science Internship to apply expertise in model optimization and deployment into real-world business environments.

TECHNICAL PROJECTS

SmartRec – Multi-task Recommendation System

January 2026 - March 2026

- Solution: Built a product recommendation engine using Matrix Factorization and Neural Collaborative Filtering (NCF) with PyTorch.
- Action: Processed user clickstream data, developed a backend API using FastAPI, and deployed a personalized UI with React.
- Result: Achieved Precision@K of 88%, significantly optimizing user discovery experience.

Sentiment Tracker – Multi-channel Sentiment Analysis

January 2026 - March 2026

- Solution: Collected social media data via Web Scraping and utilized a pre-trained PhoBERT model for customer sentiment classification (Positive/Negative).
- Action: Preprocessed Vietnamese text (Tokenization, Stopwords removal) and built a real-time sentiment trend dashboard using Streamlit.
- Result: Achieved F1-score > 85% on real-world datasets, providing rapid feedback for business decisions.

Edge-AI – Real-time Intelligent Security Monitor

September 2025 - December 2025

- Solution: Implemented a real-time object detection and tracking system (people, vehicles) using YOLOv8 optimized for edge devices.
- Action: Utilized OpenCV for video stream processing and applied TensorRT for model quantization to boost GPU inference speed.
- Result: Reached a real-time processing speed of >30 FPS with an mAP of 0.92, ensuring high stability in security monitoring.

EDUCATION

VNUHCM - University of Science (HCMUS) | 2021 – 2025

Major: Mathematics and Computer Science / Specialization: Data Science

GPA: 3.01/4 / VSTEP B1 English Certificate

TECHNICAL SKILLS

Programming : Python (Advanced), SQL, C++.

AI/ML Libraries : PyTorch, Scikit-learn, Pandas, NumPy, Matplotlib.

Techniques : Computer Vision (YOLOv8), NLP (PhoBERT), NCF, Matrix Factorization.

Tools : FastAPI, Streamlit, Docker, Git, VS Code, Google Colab, LaTeX.

Deployment : Vercel, Render.
